Jakub
Lewandowski
Junior Fullstack Developer

I am a graduate of Computer Science at Collegium Da Vinci in Poznań. I am interested in programming and diligently strive to become a Fullstack Developer.

WORK EXPERIENCE

Junior Fullstack Developer   *07.2024 - present*
MoodUp

- Implementing application functionality in the frontend layer using React and TypeScript
- Building and integrating APIs using Nest.js
- Writing unit tests for both frontend and backend layers with Vitest/Jest
- Implementing end-to-end (e2e) tests using Cypress
- Creating CI server pipelines
- Deploying the application to the production environment

Tutor   *01.2022 - present*

IT School "Ambitni" I Remote

- Leading a course preparing students for the computer science matura exam
- Preparing original educational materials

PROJECTS

Leftovers App   *2024*

An application developed from scratch by me, both on the backend and frontend, in **MoodUp**, allowing users to share cooking recipes, search for culinary inspiration, and rate recipes.

Prestika Website   *2023*

A custom made website for a business specializing specializing in the designs and sells custom bathroom built-ins. The site utilizes a CMS system from Sanity.io, allowing for content editing.
